

Dashboard

Analysis

1. The business experienced strong growth in early 2018 but struggled to maintain momentum, with a clear declining trend leading to into 2020.
2. Sales are highly concentrated, with Domino's Pizza leading significantly, while other restaurants share relatively similar sales volume.
3. The overall average meal price is \$2.49, Domino's thrives above this benchmark, while KFC has high prices but lower sales.
4. Tirupati leads with \$0.51M, while Malviya Nagar, Delhi lags at \$0.20M.
5. Non-veg meals are priced 52% higher than veg meals.
6. The most popular restaurants with 10K+ ratings are not among the top sellers.

Recommendations

1. Leverage Domino's best practices to boost performance of mid-tier restaurants.
2. Maintain mid-range pricing for volume growth and reassess premium pricing strategies to increase competitiveness.
3. Focus on expansion and promotions in top-performing cities while tailoring strategies to improve weaker markets.
4. Strengthen marketing and partnerships with popular local restaurants to convert high engagement into higher sales.
